RE: Greenhouse Gas Emissions Reduction Shareholder Resolution

Dear Mr. Bocci:

Since As You Sow filed the "Greenhouse Gas Emissions Reduction" resolution with Portland General Electric (POR), the company has announced that it will be closing its last remaining coal-fired facility, the Boardman plant, by 2020, which will significantly reduce POR's greenhouse gas emissions. We also understand that in the Integrated Resource Planning (IRP) process that is to begin in November, POR will be examining additional measures that will further reduce its greenhouse gas emissions. Consequently, we are withdrawing the resolution and look forward to continuing our dialogue with the company through the IRP process beginning in November 2011. We hope to contribute, along with other stakeholders, to the plan for POR to transition away from coal to alternative generating sources.

As You Sow, as the authorized agent of the L. Hamada and W. Hamada TTEE Williams M. Hamada Revocable Trust, does hereby withdraw the shareholder proposal entitled "Greenhouse Gas Emissions Reduction" that was filed on behalf of the L. Hamada and W. Hamada TTEE Williams M. Hamada Revocable Trust.

Sincerely,

Andrew Behar,
Chief Executive Officer
As You Sow
