

Exxon Hydraulic Fracturing Withdrawal Agreement Actions

Unconventional Resources Development “Transparency” Project

Overall purpose: Communicate unconventional resource development (URD) risks and how the company assesses and manages risk.

Approach: The “Disclosing the Facts” categories will be used as a guide for the areas and issues to be discussed:

- Chemicals
 - Use/elimination of harmful chemicals (Diesel, BTEX)
 - Public Disclosure and CBI claims
- Water and Waste Management
 - Well Integrity
 - Water monitoring
 - Flowback reuse
 - Total water use
 - Water sources
 - Non potable water policy
 - Water intensity
 - Closed tanks
 - NORM disclosure
 - Closed loop drilling
- Air Emissions
 - Green completions
 - Methane emissions
 - Low emission well pad ops/engines
 - Pipelines not trucks
 - Low emission vehicle conversion
 - NOx and VOC emissions and reductions
- Community Impacts
 - Concerns and responses
 - Aggregation of local statistics
 - Upward reporting
 - Traffic congestion
 - Road damage
- Management and Accountability
 - OIMS: Management and Leadership: Commitment and Accountability
 - Operations Integrity Management System
 - Contractor hiring

Path Forward:

- Develop conceptual draft and review with management by 3Q14.
