*Re: Withdrawal of the 2017 Shareholder Proposal*

The Company shall include in its written disclosures (website and/or Corporate Responsibility Report), annually updated methane emissions data for SoCalGas and SDG&E describing:

- the source categories of methane emissions at the two utilities;
- methane emissions, including figures calculated using industry and government agency-developed emissions factors, and methane emitted through abnormal system failures not otherwise captured in tradition reporting mechanisms; and
- use of technology to address fugitive methane emissions, and a description of how and when the technology is being used, including information on methane and safety risk management programs and miles of pipeline assessed and on what timeframe.
