

1. NRG is committed to ongoing improvements in its voluntary disclosures and to being an early sector adopter of evolving disclosure frameworks, beginning with its upcoming 2016 Sustainability report.

2. NRG agrees to include, in its Annual Report on Form 10-K for the year ended December 31, 2017 or in its Sustainability Report for the 2017 fiscal year, additional information intended to help provide investors and stakeholders with information about how NRG is managing its climate change and carbon asset risk. This information will be organized such that investors can better understand the various components of these risks and how the company is managing them. Elements of this disclosure will include nonproprietary information pertaining to:
 - How NRG views, assesses, and manages carbon and climate risk including, for instance, factors that may increase its risk of stranded assets, including state, local, and national movements to decarbonize, and increasing adoption of lower cost renewables.

 - Fleet modernization and evolving business model: What NRG is doing today to modernize its fleet - including its coal fleet - to transition to a cleaner energy, lower carbon future, what that future looks like, and how NRG is preparing for it. This may include a discussion of key trends for the company and the market along with associated business opportunities and challenges, decarbonization initiatives such as coal-to-gas conversions, and the company's investments in new and emerging technologies.
